

REMARKS:

Applicant hereby elects Invention I on which Claims 1 to 11 are directed.

Claim 18 has been cancelled. Claims 12, 19 and 25 have been amended so that they now depend from Claim 1. Thus all claims now fall within Invention I since Claim 1 is generic to Claims 12 to 17, and 19 to 26 previously indicated as being directed to separate inventions.

Applicant hereby traverses the requirement for restriction on the ground that the Examiner's indication of a separate utility for Inventions ii, iii and iv is completely unreasonable. It is simply not understood how a claim directed to a greenhouse could find utility as for example a "sleeping quarters for a group of people". It appears that the Examiner is merely selecting a noun which has no connection with the subject matter in hand. The Examiner may just as well have selected as an alternative utility an "oil tanker" or a "space ship" since none of these is in any way connected with the subject of the greenhouse to which the invention is clearly limited.

Respectfully submitted
